

Medication Policy

All permission slips will be verified the Tuesday prior to the camp out. Any change of medication will require a new Class I Medical Form to be completed. It is the responsibility of the Scout's parent to inform the Troop of any changes. A Scout may not attend the activity if the updated form is not completed prior to departure. Any medicine or prescriptions to be given to the Scout must be in the original container with his name, dosage, and times. This information must also be on the medical form for the Troop to dispense. All prescriptions or medicine is to be turned into the designated health and safety leader for the activity at check in time.

No Scout is to carry prescription or non prescription medications on his person, all medications should be given to the health and safety leader. (The only expectation is if the Scout needs an inhaler, then the Scout can keep the inhaler with him. The inhaler needs to be listed on the 3x5 card and the leaders in charge notified.) You will need to put your Scout's medications or non prescription medications in a zip look baggie with the instructions written plainly on a 3x5 card with your Scout's name.
